It will certainly have no doubt when you are visiting choose this book. This impressive **Artificial Intelligence And Exponential Technologies: Business Models Evolution And New Investment Opportunities (SpringerBriefs In Applied** book can be checked out entirely in particular time depending upon just how usually you open and read them. One to keep in mind is that every book has their own production to obtain by each reader. So, be the excellent viewers and also be a better individual after reading this book **Artificial Intelligence And Exponential Technologies: Business Models Evolution And New Investment Opportunities (SpringerBriefs In Applied**

From the Back Cover

Artificial Intelligence is a huge breakthrough technology that is changing our world. It requires some degrees of technical skills to be developed and understood, so in this book we are going to first of all define AI and categorize it with a non-technical language. We will explain how we reached this phase and what historically happened to artificial intelligence in the last century. Recent advancements in machine learning, neuroscience, and artificial intelligence technology will be addressed, and new business models introduced for and by artificial intelligence research will be analyzed. Finally, we will describe the investment landscape, through the quite comprehensive study of almost 14,000 AI companies and we will discuss important features and characteristics of both AI investors as well as investments. This is the “Internet of Thinks” era. AI is revolutionizing the world we live in. It is augmenting the human experiences, and it targets to amplify human intelligence in a future not so distant from today. Although AI can change our lives, it comes also with some responsibilities. We need to start thinking about how to properly design an AI engine for specific purposes, as well as how to control it (and perhaps switch it off if needed). And above all, we need to start trusting our technology, and its ability to reach an effective and smart decision.
