Comprehensive manual for holding family meetings and parenting groups.

By Reevah

The manual offers step-by-step instruction on how to help parents with any behavior problems they may be experiencing with their children through age 18. There are specific strategies to deal with specific problems. There are also explanations as to why parents are reluctant to become authority figures and take control of their children followed by specific interventions to meet each opposition. This manual is especially helpful for therapists new to the field and also gives experienced therapists additional "tools" for their therapeutic toolbox.

Very specific, direct and it actually works if you follow through.

By Joseph A. Russell

This technique has been used successfully by many therapists and parents alike. As with any successful program, the most difficult part is following through. If you do that, this works. it is an excellent parenting manual with a description of the philosophy, forms for therapists or group leaders, handouts, scripts and a follow up session overview. Highly recommended.
