CREATING REALISTIC LANDSCAPES FOR MODEL RAILWAYS BY TONY HILL PDF

The landscape through which railways run is often the inspiration and reason why people choose to model a particular line. Therefore creating a realistic setting in which to operate your railway is an essential aspect of modeling, yet it is often overlooked or left until the last moment. Creating authentic and believable scenery without spending a fortune or buying it 'ready made' is a skill that, with patience and understanding, can be achieved. In *Creating Realistic Landscapes for Model Railways*, highly skilled landscape modeler Tony Hill shows you, through step-by-step photo sequences and clear instructions, how you too can re-create a realistic landscape for your model railway.

Interesting ideas; I look forward to trying them

By Comment Man

This book is full of good ideas for modeling scenery for model railroads; many of them are quite different from ideas in the American books. Hill has extensive ideas on modeling water, trees and stone walls. I plan on trying his technique for modeling waterfalls and maybe his use of clay for modeling walls. I have a suspicion many of his ideas would work best in HO or larger scales (I model in N scale); his ideas for trees are particularly extensive and interesting.

I think this book is worth having, if only to complement the other scenery books you have, but the Amazon price is a bit outrageous. I bought the book through Amazon marketplace for half the price Amazon listed.

Its a very nice book printed from durable paper covered with a plastic coating, so you could consult it while you actually worked on the railroad.
