Take Blogging to a Whole New Level

By Yolanda Facio

I've been blogging for at least a decade or more and I still found exceptionally helpful nuggets of information

inside *How to Write 37 Different Types of Blog Posts*. I heavily highlighted areas to return to for a new blog I'm starting this month. The thing is, not every post type fits your audience. Ms. Arrow focuses on getting you to really think about who you are writing for. I kept my newest blog idea in mind, along with the audience who will likely be reading it, as I worked through Ms. Arrow's book. It helped me pick out the best post types and formats for creating a content calendar that will really resonate with my prospective readers.

37 Blog Posts is a quick read, with helpful and timely information any blogger - beginner or seasoned - can use to get more readers, more traffic, more social shares, and even more sales!

I recommend this book to anyone who is serious about blogging

By M.C. Simon

"How to write 37 different types of blog post" will give you useful information about the types of blog posts that work and their reason for why you'll have success. You will also understand how to get the best results using the type of blog posts that you chose.

If you want to know how to avoid blogging mistakes, or how to plan your blog's content, I recommend reading Sarah Arrow's book. This was already the third or fourth book I have read by this author. After reading each one of her books I always told myself... Sarah Arrow is a "blogging Encyclopedia".

Reading the book and seeing such a well-organized list with all 37 types of posts, I suddenly felt that I will never have another "writer's block" moment. My mind can temporary be "blocked" by one, two, or three subjects but... for sure not all 37 types.

To conclude, I recommend this book to anyone who is serious about blogging, no matter if you have been blogging for a long or short time. A special recommendation is addressed directly to all beginner bloggers. I know how it is to start in this field; I know how hard it is to track the good information down on all aspects you will encounter. Reading this book will provide you an abundance of valuable knowledge and more than this, you will have all you need in a single source.
