A Must-Read For Anyone Passionate About Health & Wellness

By StephanieJHale

I first met Selva via The Millionaire Bootcamp for Authors and sensed he was a special person even then. The contents of this book have confirmed that belief. He is an extra-special person with a wealth of knowledge and gifts to share with those who will listen.

This book is a "must-read" for all those who are passionate about health and wellness while wanting to make a fortune out of this new one trillion dollar growth industry.

Selva explains why the current sickness based health care system in the US is unsustainable and provides a compelling case for the adoption of preventive health care system called wellness health care. He then goes on to give examples of opportunities for all those interested in making a future in the wellness industry.

It is not only easy to read but also both informative and inspirational- the book to buy on this subject.

Modelling success can lead to success

By Peggy McColl

If you are interested in learning more about success it is a known fact that when you follow someone who has created success and model them, you too can be successful. In Selva's book he states: "Success is all about getting from where you are in life to where you want to be, and that's what this book is about." Therefore, if being successful is on your radar and you have a desire to get there, dig in and be prepared to be inspired by some new, enlightening and brilliant ideas.

A unique perspective on making money in an incredibly lucrative field

By Dustin Mathews

It's tough to know who to trust out there and what information is real. Just take a look at most reviews.

And most information about making money is just plain irrelevant. However, the author (Selva) has exposed a few "counter-intuitive ideas" for making money in the incredibly profitable field of Health & Wellness.

If you're looking for a fresh perspective on making a fortune in this industry, look no further.
