This timely and fascinating book illustrates how applied geography can contribute in a multitude of ways to assist policy processes, evaluate public programs, enhance business decisions, and contribute to formulating solutions for community-level problems.

The book showcases studies by applied geographers from across the globe collaborating with the public sector, businesses, NGOs and communities to demonstrate how geography - with its space and place perspective and its explicitly spatial methods and tools - has been employed to address significant real-world issues. The 20 case studies have been conducted at a variety of levels of scale and situational contexts, and employ a range of quantitative and qualitative approaches including spatial and statistical modelling, Geographic Information Systems (GIS), impact analysis and action research.

This enlightening and informative book will prove an invaluable reference tool for academics, students and practitioners with a specific interest in applied geography and spatial analysis.
