## Review

"Although th ebook is nominally a report of the findings of a study of young-prisoner suicides in four young-offender facilities in England and Wales, its value goes far beyond that...Professor Liebling's book is a systematic critique of the previous work on prisoner suicides; an attempt to differentiate between attempted suicide, parasuicide, and self-injury; a critique of the methodology that has come to dominate the study of suicide; and a reconceptualization of the notion of suicide causation using a model based on the interaction of vulnerability, coping ability, and the situational factors. It has moved to the forefront of work on prison suicides and has become required reading for anyone interested in the topics of prison, suicide, or prison suicides."
