Great information that should be taught in school

By MSTexas

This book is a must read for those that are interested in great health. If you read this book you are going to clean your septic system. One thing you will come away with is the knowledge that you can't keep treating symptoms and expect to get better. Doctors usually treat symptoms. Your septic system is the root of most of your problems. Clean it on a regular basis and your body will heal itself. The body wants to heal itself and does an amazingly good job of it. But if it is overcome by poisons it can't heal itself. 5 stars!

This book confirmed everything my naturopath told me about how we begin to heal at the bottom upward. He had been ill as a very young man in life and met someone who understood cleansing as well as other natural foods for wellness. Long story short, this is an excellent and my best friend wants to read it now. :)
